DESCRIPTION

Control unit that allows you to implement the management of basic home automation for the control of shutters, windows and alarms on the standard Koolnova system.

ModBus RTU device on RS485 that does not require address configuration, it is automatically assigned by the system.

Clear and comprehensive status indication via illuminated front panel.

As with all ModBus installations, it is necessary to use certified RS485 cables as well as for the BUS termination resistors.

Management of the system only via the KOOLNOVA CLIMA application.

HOME AUTOMATION MODULE

CODE DESCRIPTION	CODE	PRICE
HOME AUTOMATION MODULE:	KN-MDZ	€699.90
