CODE DESCRIPTION	CODE	PRICE
FAN-COIL INTERFACE:	NH-GTP-UNI2	€329.90

DESCRIPTION

This device allows you to control both the stop/start as well as the change in operating mode (cold/heat) of the installation, as well as the speed of the fan-coil (0-10V output available).

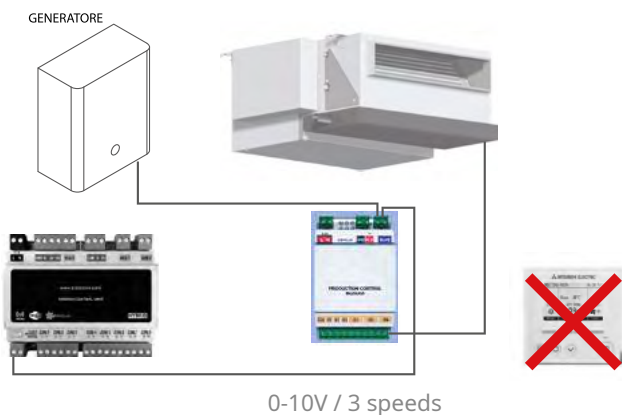

Configurable as production control and fan-coil control.

The same module with 4 connection possibilities.

CHARACTERISTICS

- KOOLNOVA BUS connection input.
- Two wires without polarity.
- Isolated relay output for ON/OFF control of the fan-coil.
- Isolated relay output for system production control.
- Isolated relay output for 3 speed control.
- 0-10V output for fan-coil speeds.
- Machine selection (AC) via Switches.
- Control of the operating mode (cold/heat).
- Operation indicator LED diodes.
- Power supply: 230 V~ 50/60Hz.
- Supply voltage: 90-264 Vac.
- Frequency range: 47-63Hz.
- Max power: 3.5W.
- Class II.
- Weight: 139g.
